

Audit Report:

Token Name: Monsta XRP

Token Symbol: MXRP

Total Supply: 10000000

Contract Address: 0xbce62f8936b1aff0a57ceb3d1031486f1d61d095

Contract Verified: Yes

Creator Address: 0x2fae9eb5e7a565292a018fed0b321c5543f77ca8

Owner Address: 0x0000000000000000000000000000000000dead

Renounced Ownership: Yes

Can take back Ownership: No

Hidden Owner: No

Proxy Contract: No

Contract Function:

Tax modifiable Function: Yes (Renounced Ownership)

Excluded from Tax Function: No

Anti Whale Function: Yes (Renounced Ownership)

Anti Whale modifiable Function: Yes (Renounced Ownership)

Blacklisted Function: No

Whitelisted Function: Yes (Renounced Ownership)

Trading pausable Function: No

Trading cooldown Function: No

Owner can change Balance Function: No

Mint Function: No

Self-Destruct Function: No

External Call Function: Yes (Renounced Ownership)

Audit Score:

95 / 100%

Contract Verified:	■ This indicates whether the contract has been verified for authenticity. If the contract is verified, it means the contract is authentic and trustworthy.
Renounced Ownership:	■ If true, it means the ownership of the contract has been renounced. Renouncing ownership means the owner no longer has control over the contract.
Can take back Ownership:	■ Specifies if the ownership of the contract can be reclaimed. Sometimes, ownership can be reclaimed if the owner provides a valid reason.
Hidden Owner:	■ Indicates whether there is a hidden owner associated with the contract. A hidden owner is one who is not publicly known or disclosed.
Proxy Contract:	■ Denotes whether this is a proxy contract. Proxy contracts act as intermediaries between the user and the actual contract.
Tax modifiable Function:	■ Specifies if functions related to tax are modifiable. This allows for flexibility in adjusting tax-related parameters.
Excluded from Tax Function:	■ If true, the contract is excluded from certain tax-related functions. Exclusion from tax functions means the contract is not subject to those specific tax rules.
Anti Whale Function:	■ Indicates the presence of an anti-whale function. Anti-whale functions are designed to prevent large holders (whales) from manipulating the market.
Anti Whale modifiable Function:	■ Specifies if the anti-whale function is modifiable. Allowing modification provides flexibility in adjusting the anti-whale parameters.
Blacklisted Function:	■ Specifies functions that are blacklisted or restricted. These functions may be blocked or limited in their execution.
Whitelisted Function:	■ Denotes functions that are whitelisted or allowed. Whitelisted functions have been approved and are permitted to execute.
Trading pausable Function:	■ Indicates whether trading can be paused through a specific function. Pausing trading allows for temporary halts in trading activity.
Trading cooldown Function:	■ Specifies functions related to trading cooldowns. Cooldowns may be implemented to prevent excessive trading or manipulation.
Owner can change Balance Function:	■ Indicates whether the owner can change the balance through a specific function. This function allows the owner to adjust the balance of the contract.
Mint Function:	■ Denotes the presence of a function for minting new tokens. Minting creates new tokens and increases the total supply.
Self-Destruct Function:	■ Specifies if the contract has a self-destruct function. A self-destruct function allows the contract to be destroyed and its funds sent to a designated address.
External Call Function:	■ Denotes functions that make external calls to other contracts or services. External calls allow the contract to interact with other parts of the blockchain ecosystem.
